EDUCATION

NATIONAL UNIVERSITY OF SINGAPORE (NUS)

August 2024 – June 2028

Bachelor of Science (Hons) in Data Science and Analytics

- Second Major in Physics & Minor in Business.

WORK EXPERIENCE

PricewaterhouseCoopers (PwC) Consulting

Digital, Cloud & Data Consulting Intern (Incoming)

December 2026 – January 2027

Seagate Technologies, Data Science and Analytics Intern

May 2026 – Present

- Built a dashboard flagging idle machines based on activity patterns, preserving 50K+ daily media tests.
- Developed a machine learning model to predict production delays and identify root causes, reducing up to 2 hours of equipment downtime per day by informing technician workflows.
- Implemented ETL pipelines processing 15M+ manufacturing records daily, centralising data for 20 engineers and accelerating production discrepancy analysis.

NUS Faculty of Science, Science Club

Welfare Director (Sponsorship Acquisition)

September 2024 – September 2025

- Elected with 70% of the vote to represent 5,500+ undergraduates as Welfare Director.
- Led sponsorship pitches and negotiations with external partners, increasing cash sponsorship by 50%+.

TECHNICAL SKILLS

Languages: Python, R, Java, JavaScript, SQL, HTML/CSS.

Data & AI: pandas, NumPy, scikit-learn, TensorFlow, Matplotlib, Plotly, Power BI, Tableau, NLP, LLMs.

Databases & Development: PostgreSQL, MySQL, React, Node.js, FastAPI, Prefect, Git/GitHub, Jupyter Notebook.

PROJECTS AND COMPETITIONS

Infineon AI Supply Chain Case Competition (2nd of 63 Teams | \$2000 Prize)

June 2026 – July 2026

- Built a full-stack AI supply-chain control tower combining LLM-based disruption detection, route optimisation and automated communications, identifying alternate routes that protected €4.53M (78%) of at-risk shipment value.
- Engineered a Python web-scraping and NLP pipeline to structure live disruption events and map them to affected shipments, supporting monitoring of a corridor carrying 82.8% of shipment value.
- Pitched the solution to 200+ Infineon staff and regional directors.

PwC Whole Leadership Award 2026 Consulting Pitch (Winner | \$1000 Prize)

June 2026

- Advised a simulated client on implementing an AI chatbot to potentially reduce staff workload by up to 60% across 800 daily calls, defining rollout, performance monitoring and training measures to target 90%+ accuracy.

Agentic AI Career Planning Platform for Undergraduates

- Developed an agentic AI career-planning platform using LangGraph, Amazon Bedrock and AWS to generate personalised career roadmaps from student profiles and target roles, cutting search time by 70% in user testing.
- Built backend APIs and a multi-agent recommendation workflow that retrieves, ranks and returns relevant hackathons and projects from NUSMods, Devpost and GitHub to the frontend.

Causal Uplift Modelling for Targeted Marketing

- Evaluated the effectiveness of a retail marketing campaign through a randomised A/B test, finding promotions increased purchase conversion by 5.5% versus control.
- Trained and tested S-/T-/X-Learner uplift models to identify promotion-responsive customers, boosting incremental purchases by 99.4% versus random targeting.

NUS Tax Competition Debate Round (2nd of 52 Teams | \$300 Prize)

May 2026

- Debated AI, employment and corporate tax policy in Singapore before judges from PwC, EY and Deloitte.

ADDITIONAL INFORMATION

Awards/Achievements: 3 x Case Competition Winner, Claire Chiang Student Outstanding Leadership Award, NTUC Care (Education Awards) 2025 for academic excellence, 6 Distinctions in the GCE O' Level Examinations.
